Why Exploros for Florida?

Florida educators juggle a lot: limited instructional time, diverse learners, and the constant need to engage every student. Exploros brings the essential pieces together to help teachers thrive. Teacher-guided, device-enabled learning experiences promote true social learning—so every student shares ideas, supports claims with evidence, and strengthens historical and social studies thinking skills.

Instead of piecing together materials, teachers launch ready-to-teach Florida experiences filled with primary and secondary sources, graphic organizers, and embedded checks for understanding.

The result: more time to guide learning and connect with students.

▼ Students use their devices to brainstorm. The results appear on the whiteboard and fuel discussion.

Built for the Florida Standards

As a supplemental curriculum provider, Exploros understands the importance of standards coverage. Our courses offer comprehensive standards coverage, giving teachers maximum flexibility to support the core curriculum while helping them teach effectively and engage every student as an active contributor to learning.

What educators can count on

- Clear course, unit and lesson structure aligned and clearly tagged to the Florida standards.
- Formative and summative checks aligned to content and skills with dashboards and reports to inform teaching.
- Teacher notes and prompts that help teachers guide instruction.
- A balance of content knowledge, source work, writing, and discourse.

The screenshot shows the Exploros Library interface. At the top, there are tabs for 'Assign Experience' and 'Course Catalog', and a search bar labeled 'Search by name'. Below the tabs is a 'Library' section with a list of courses. Each course entry includes a small icon, a course title, and a brief description. The courses listed are: American History (icon: 5), Ancient World History (icon: 6), Civics (icon: 7), US History Through 1877 (icon: 8), US History Since 1877 (icon: HS), Government (icon: HS), World Cultural Geography (icon: HS), and USCIS Citizenship Test Review (icon: HS).

What is Social, Social Studies?

17

Responses per
Student per Class

At the heart of Exploros is student voice. In every class, students collectively post hundreds of times. They brainstorm, surface prior knowledge, build graphic organizers, answer polls, and complete assessments. Some work appears to the class, while other work is visible only to the teacher. There are no bystanders – every student contributes. Teachers use this student input to steer instruction and spark productive dialogue. That inclusive, ongoing conversation, grounded in engagement from all learners, is what we mean by Social Social Studies.

Teacher Guided, Student-Centered

A simple approach with powerful results. Teachers plan in lessons; students live in social feeds. Exploros bridges both with Florida-standards-aligned learning experiences that look like a lesson plan and run like a live class stream. During instruction, students post responses, graphic organizers, polls, images, and exit tickets in real time, so teachers see understanding emerge as it happens.

Those live posts make learning visible. Teachers quickly see how the class is progressing as a whole, who's on track, and who needs individual support. They

can then decide when to extend, elaborate, or reteach. Embedded teacher notes scaffold each step with likely misconceptions, discussion prompts, and facilitation tips—so planning time goes further and instruction stays focused.

Teachers keep full control of pacing and flow. They can reveal content when ready, pause for discussion, branch into small-group work, or bring the class back together—all while preserving the integrity of the lesson sequence. The familiar structure supports teacher craft; the social layer activates every learner.

▼ FL standards tagging

Teacher notes

Live student input

The Teacher View interface shows a lesson plan for 'The Declaration of Independence' (FL-SS). It includes an 'Engage' section with an 'Overview' and an 'Objective'. The 'Overview' states that students will examine the Declaration and analyze its meaning. The 'Objective' is to summarize the main ideas. A 'Facsimile of the Declaration of Independence' is shown. Below the facsimile, there is a video link and a prompt to write key words and phrases. A 'Live student input' section at the bottom displays a word cloud of student responses: independence, historic document, revolutionary, inalienable rights, freedom, jefferson, free people, july 4, and all men are created equal.

Student response entry

The Student View interface shows the same lesson plan for 'The Declaration of Independence' (FL-SS). It includes an 'Engage' section with an 'Objective' and a 'Facsimile of the Declaration of Independence'. Below the facsimile, there is a video link and a prompt to write key words and phrases. A 'Student response entry' section at the bottom displays a word cloud of student responses: independence, historic document, revolutionary, inalienable rights, freedom, jefferson, free people, july 4, and all men are created equal.

Student View

Teachers guide the learning using a view that looks like a lesson plan. Students have their own view with places to post into the lesson. Teachers have embedded notes, pacing controls, and a whiteboard view.

Options for Every Learner

Exploros course playlists are built for impactful Tier 1, whole-class social instruction, where most learning happens.

But educators have options. Because flexibility is built in, teachers can flip the classroom, run differentiated small-group rotations, or include remote learners—all while using the same playlist, pacing, and social flow.

Beyond the Florida course playlists, teachers and students can access a library of 1,000+ curated articles and videos. Use them within a learning experience or as stand-alone resources for enrichment, reinforcement, or intervention.

The live, social platform delivers the highest student engagement; when print is the better fit, each article is printable and includes reading-comprehension checks and extension prompts. Either way, teachers have a reliable, standards-aligned option at their fingertips that drives academic achievement.

Learning Experiences

Device-enabled, teacher-guided experiences that engage all students.

Articles and Videos

Used in the experiences, but can also be assigned separately.

Printable Resources

All articles can be printed, and include comprehension and extension questions.

Remarkable State-Testing Gains

What is the result of true student engagement? Academic gains.

In a case study of approximately 19K middle school U.S. History students across dozens of campuses, the average state testing gain was a remarkable 29%.

These types of gains were consistent across all student demographics (e.g. at-risk, economically disadvantaged, limited-English). When students have increased ownership and voice, they learn more.

A Seamless Solution for Teachers

Plan in minutes, not hours.

Each learning experience includes curated sources, explicit prompts, graphic organizers, and embedded assessments that together form a complete, class-ready learning experience with sound pedagogical progression.

Teachers can add context, adjust pacing, or drop in other points or materials while keeping the backbone of the lesson intact and standards-aligned.

Included in every experience

- Teacher guidance: lesson objectives, pacing notes, suggested prompts, and facilitation tips.
- Standards-based resources: Articles, videos, primary source documents, illustrations, images, and other materials.

- Consistent student tasks: short writing, polls, tables, drawings, map work, and source analysis with a mix of social interaction and real-time sharing to the teacher. *With Exploros, students actually perform the verb in the standards.*

- Assessments: auto-scored items plus constructed responses; exit quizzes aligned to lesson targets.

- Differentiation and personalization options, including text-to-speech and dynamic language translation.

The Exploros course playlist approach makes it simple to assign and guide experiences designed to immerse students in the Florida standards according to the district pacing guide. Teach with Exploros every day, or supplement other approaches.

Teachers have a playlist of learning experiences for their specific Florida course – Open the course, choose a unit, then choose a learning experience to preview or assign.

Each experience is tagged to the FL Social Studies Standards.

The screenshot displays the Exploros interface. At the top, there are tabs for 'Assign Experience' and 'Course Catalog', and a search bar labeled 'Search by name'. Below the navigation, the breadcrumb trail reads 'Library / American History / Colonial America'. The main content area lists four learning experiences, each with a thumbnail image, a title, a description, and a list of Florida Standards (FLSS) tags. The first experience is 'The Search for Wealth', followed by 'The Struggle for Religious Freedom', 'The Establishment of Self-Government', and 'Life in Colonial America'. The 'The Establishment of Self-Government' experience shows a detailed list of standards: FLSS, SS.5.A.4.4, SS.5.A.5.1, SS.5.CG.1.3, and SS.5.CG.2.2. A 'Small Groups' button is visible in the bottom right corner of the interface.

All Students Have a Voice

Exploros is built around participation. Within the context of the daily classroom lesson, students post short responses, upload images, draw, build tables, or vote in polls –mimicking the communication forms they use in life outside of school, yet channeling their energy toward standards-based learning.

Some sharing is social and to the class, some work is small group collaboration, and some is individual work shared with the teacher. In all cases, every student has a voice and contributes to the classroom experience many times per class.

The true engagement elevates peer interaction, broadens perspectives, and deepens learning.

Student-Facing Lessons

Every student has a view of the lesson, which unfolds at a pace chosen by their teacher. This means:

- Students build their own digital lesson portfolio in every class.
- Students can always review past work.
- Students can translate the lesson to any language, including their peers' posts.
- Students can use read-aloud and other accessibility features.

These personalization and accessibility features are ideal for emergent bilingual students and others that benefit from language supports.

Write your own definition of the word citizen.

Buddy Wade 09/15/25 9:36am
Someone who was born somewhere and has rights because of it... "She was a citizen of the U.S."

Israel Leon 09/15/25 9:36am
A person from a country who pledges allegiance to the country.

Sara Chapman 09/15/25 9:37am
Someone who comes from a certain place and calls it home.

Bell Gill 09/15/25 9:36am

Students share ideas, develop graphic organizers from primary sources to share with the teacher, and other active learning activities based on Florida standards.

Within Exploros, any text can be translated to any one of one hundred languages.

Lori Sixtos
Elementary Social
Studies Teacher

“Even though Exploros is digital, it still gives us space to debate and talk through different answers and thought processes. It is awesome to see that kind of critical thinking and engagement.”

High-Quality Instructional Materials (HQIM) in Practice

Exploros reflects HQIM principles throughout the user experience. Materials are coherent across a course and consistent lesson to lesson, so students recognize the structure and teachers can focus on facilitation instead of assembly. Every experience embeds formative checks and opportunities for students to show thinking in multiple ways.

HQIM pillars and how they look in Exploros

- **Coherence:** unit playlists sequence the big ideas and connect skills across lessons; terminology and routines are consistent across the course.
- **Alignment:** learning targets and tasks explicitly address Florida standards; reporting visualizes standard-level progress over time.

- **Quality Texts & Tasks:** curated primary/secondary sources, maps, images, and data sets drive analysis, not recall.
- **Assessment:** auto-scored items plus constructed responses and discussion evidence feed a usable picture of learning.
- **Access & Supports:** leveled readings, text-to-speech, translation, and organizers support diverse learners without leaving the lesson.
- **Usability:** ready-to-teach scenes, teacher tips, and pacing guidance reduce prep and support day-one implementation.

Together, these elements help districts deliver consistent, standards-aligned instruction while preserving teacher voice and local relevance.

The Social, 5E Learning Model

Exploros learning experiences follow a predictable 5E arc (Engage, Explore, Explain, Elaborate, Evaluate) or a simplified 3E arc (Engage, Explore, Evaluate) optimized for social learning. Teachers guide the flow with natural pauses for talk, quick checks, and spotlighting exemplar student work. This predictable pattern builds classroom momentum. Master teachers exercise teacher-craft and content understanding,

while new teachers have a framework for success. What happens in each phase:

1. Engage: activate prior knowledge with a provocative prompt, image, or short poll to surface initial ideas.
2. Explore: students read, annotate, and gather evidence from sources; they post takeaways and questions.
3. Explain: the class synthesizes, names concepts, and connects evidence to claims; teachers model academic language.
4. Elaborate: small-group tasks extend or apply ideas—maps, timelines, case studies, or local Florida connections.
5. Evaluate: quick, built-in checks give immediate feedback to students and actionable data to teachers.

Because students regularly post thinking, educators see more student participation, which creates the foundation for learning.

Students share their thoughts during a lesson engage warm-up.

As you read, summarize the meaning of each principle here. Try to use your own words.

Principle	Meaning
Popular sovereignty	Rule by people
Republicanism (Representative government)	People vote for leaders
Federalism	Shared power
Separation of powers	Gov't is split in 3 branches
Checks and balances	Branches limit each other's power and...
Rule of law	Leaders that are NOT above the law.
Individual rights	Basic rights, freedom, liberty, and pursu...

Each student reads an article and summarizes the main point in a graphic organizer before class discussion.

Write some examples of democratic values and principles.

Beth Smith 09/10/25 8:36am
Free elections, equal rights, rule of law, minority protections

Israel Leon 09/10/25 8:36am
Rule of law protects rights through independent courts and transparency.

Sally Carpenter 09/10/25 8:37am
Checks and balances limit government power, safeguarding liberties.

Belinda Sill 09/10/25 8:38am
Free speech and honest media informs people to make good civic decisions.

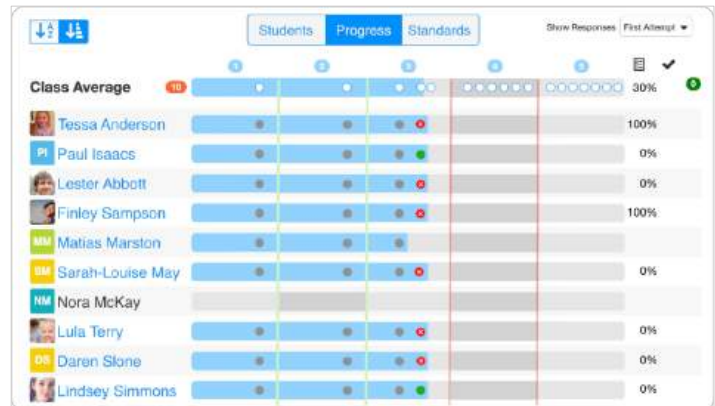

Students complete an experience with an Evaluate Exit Quiz. Teachers see an instant heat map of the results.

Classroom Analytics | Digital Portfolios

Exploros turns classroom activity into useful formative and summative assessment data without extra steps. Live dashboards show who is present, where students are in the lesson, and how they are doing on embedded checks and exit quizzes. Teachers can pause the class based on what they see, address misconceptions, expand on key points, or host a discussion to reinforce learning. Prompts in the teacher notes provide scaffolding for key points to focus on based on student input.

Standards-based reports aggregate evidence over time—auto-scored items, constructed responses, and discussion artifacts – so teachers and leaders see which standards have been taught and where students still need support. Every metric links back to the underlying student work stored in each learner’s digital portfolio, which teachers and students can access.

▲ A live lesson progress dashboard

Why this data matters

- Formative feedback today; longitudinal growth evidence tomorrow.
- Clarity for PLCs: item analysis and standard heat maps inform reteach plans.
- Transparency for families and students as portfolios capture authentic student classroom work.

“Using Exploros, our campus did so well my district thought we were cheating... The data was key.”

Reginald Clark
Secondary Social
Studies Teacher

Administrator Visibility for Success

Exploros complements in-person walkthroughs. When you're responsible for dozens or hundreds of classrooms, it's hard to get a timely, representative picture from site visits alone. Exploros provides supportive visibility so leaders can understand how learning is progressing and where to invest coaching time.

Practical, virtual "site visits" with authentic evidence.

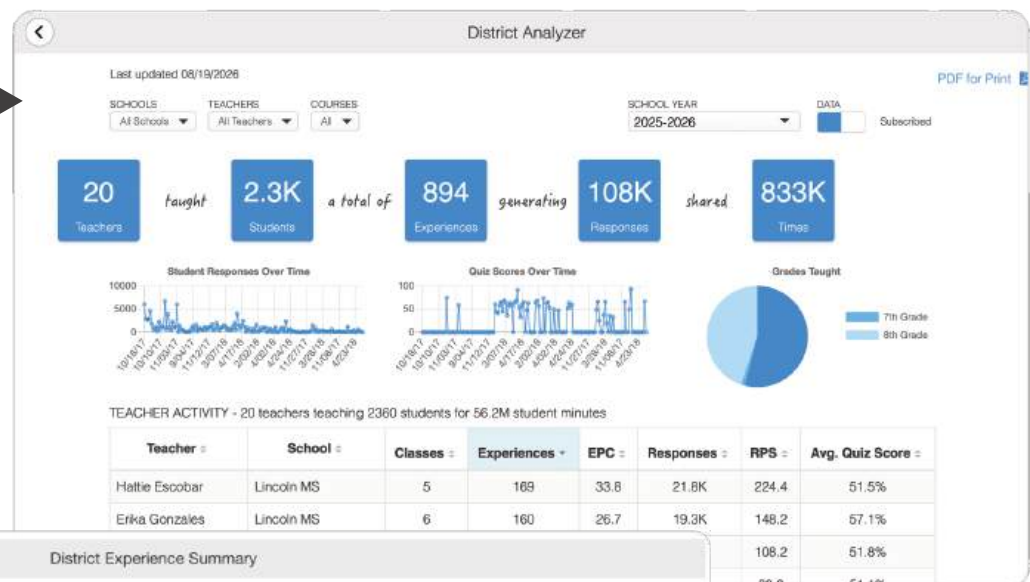

- Live view of what is being taught at the district, campus, and classroom levels.

- Digital learning experience portfolios to review the depth and quality of student work.

- District and Campus Analyzers to observe usage, pacing, and standards progress across cohorts.

Leaders can celebrate successes, focus on teaching practices and the art of teaching, target support, and reduce the lag between need and action.

The Campus and District Analyzers give administrators and coaches a view of implementation success. Behind every metric are the underlying digital student portfolios, which can be viewed at any time.

The Experience Summary Report is a window into every classroom experience with a digital portfolio of student work.

“Exploros makes a first-year teacher feel like a fourth-year teacher and gives experienced teachers new ways to engage students.”

Joni Rodela
Social Studies & World
Languages Coordinator

Integrations & Cyber-Security

Exploros fits into your ecosystem. Districts can roster and/or sign on with a variety of systems, including:

SSO: Google, Classlink, Clever

LMS: Google Classroom, Schoology, Canvas

With Exploros LMS assignment and grade-pass back integrations, teachers can keep assignment and grading workflows intact. Teachers spend less time on clerical work and more time facilitating learning.

A screenshot of the Exploros login page. At the top is the Exploros logo. Below it are four blue buttons for single sign-on: "Sign in with Google", "Sign in with ClassLink", "Sign in with Clever", and "Sign in with GG4L". To the right of these buttons is a vertical line with a circle containing the word "or". Further right are two input fields: "Username or email address" and "Password". Below the password field is a blue "Log in" button. At the bottom, there are two links: "Forgot your password? [Reset it.](#)" and "New student? [Join a class and sign up.](#)".

At Exploros, security and privacy are foundational. We hold a SOC 2 cyber-security attestation, which few companies in the education space attain, and we are annually independently audited for security.

CYBER-SECURITY

Effective Professional Learning and Immediate Support

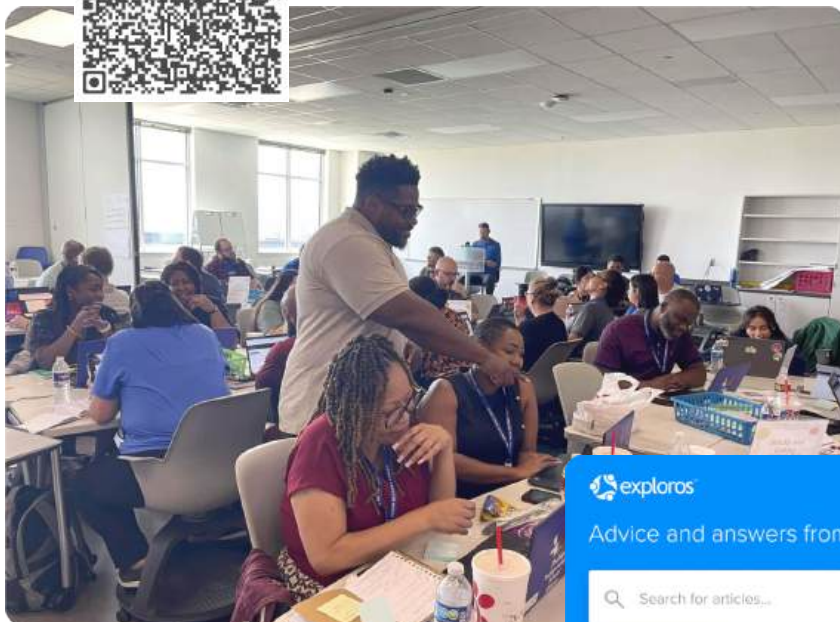

Implementation moves quickly because Exploros is teachable on day one.

Teachers can get started with a webinar or an on-site training session. Additional support is offered via live human chat, an AI-assisted searchable knowledge-base, pre-recorded trainings, and a series of library of 3-minute how-to videos.

Once educators are comfortable with the basics, Exploros offers more in depth training to help improve teacher-craft, strengthen data-driven instruction, advance implementation success, and drive Social Studies improvement.

Scan to learn more about Professional Learning and Implementation options.

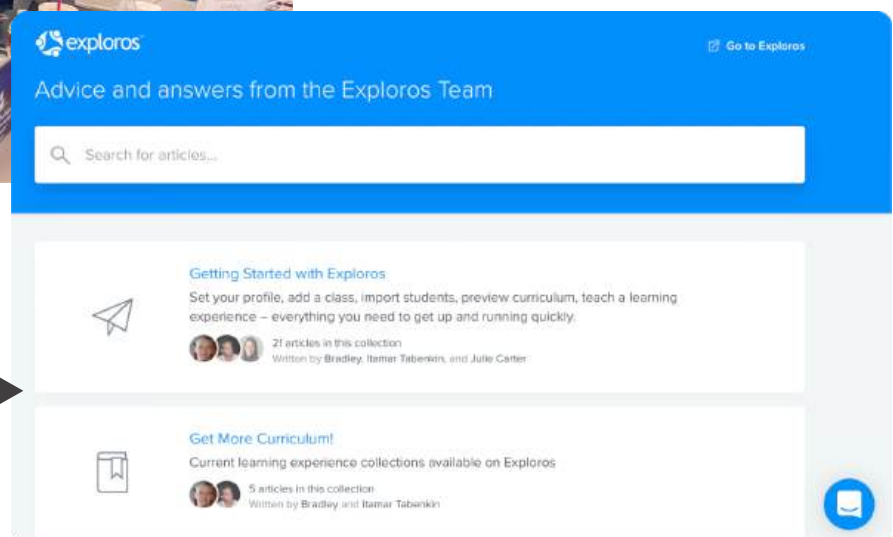

- ▲ Face-to-face training workshops bring teams together for implementation success.

Exploros has a variety of on-demand help: live chat, knowledge-base, tutorial video series, Best Practices Teaching Guides.

- ▲ A 90-minute webinar gives teachers all they need to start teaching. Exploros offers Best Practices webinars for more advanced users.

Developed for All Stakeholders

TEACHERS: With Exploros, teachers get complete Florida course playlists of class-length, pedagogically strong learning experiences that engage all students. Teachers choose what they want to teach, assign to the class or differentiated groups of students, and then guide the social classroom learning. Exploros helps stage the lesson and gets all students to contribute. Teachers see class and student understanding in real-time, and can host enriched discussions, reteach, or expand to personalize the learning and address student needs. Exploros Analytics makes it simple to monitor class and student progress, and address Florida standards that need attention.

STUDENTS: Exploros allows every student to have a voice in the classroom – there are NO bystanders. This increases the variety of perspectives and enriches classroom dialogue. How does it work? All students use social-media-style posting in the learning experience itself. This student agency increases ownership. It also personalizes the learning – not through a computer trying to figure out what a student needs – but through making learning personal. The results have shown a dramatic increase in academic achievement. In a large case study, Exploros students demonstrated 29% gains on state testing.

ADMINISTRATORS: Overseeing social studies success across multiple campuses can be challenging. With Exploros, administrators have real-time visibility through Classroom Analytics. They can see what is being taught in each classroom in real time, see implementation success dashboards, and see Florida Social Studies Learning Standards-based reporting at the district, campus, teacher, and student levels. This unprecedented information helps drive instructional improvement. Exploros makes it simple to get up and running, with integrations to Google, Canvas, Schoology, Classlink, and other systems. Exploros is also ahead of other solutions when it comes to cybersecurity, with SOC2 attestation, the gold standard in security.

PARENTS: While Exploros is a digital program, parents and guardians can rest assured that their children are not learning from a device. Instead, they are exercising their voice in the social classroom and connecting more with their teacher. Exploros fosters enriched classroom discussion and increased engagement and ownership in learning. Parents also have access to student work at any time through their child's login. Exploros keeps a digital portfolio of all student work, as well as achievement results. This portfolio can be viewed at any time, translated into different languages, read aloud, and more.
